"The ADF is currently unable to provide a severe food allergy-free environment (such as from peanuts) in relation to the consumption of food during cadet activities which involve centralised catering. Such a risk may be life threatening for children who suffer from a severe food allergy, and parents may consider it is in their children's best interest not to allow participation in the proposed activity. In the event that such children do attend a catered cadet activity, parents are asked to provide sufficient meals from home to cover the duration of the activity".
